

## Activitat 2: El repositori GitHub (20%)

**Primer de tot anem a la pagina de github i creem una cuenta si no tenim.**

**Anem en esta part i donem a “New repository”**

I aquí fem el nom del repository, fem una descripció i fem que sigui públic per a que pugui accedir el profe. I també activem “Add a README file”

## Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere?

[Import a repository.](#)

Required fields are marked with an asterisk (\*).

Owner \*

 moussa2545tr ▾

Repository name \*

/ Projecte 6

✓ Your new repository will be created as Projecte-6.

The repository name can only contain ASCII letters, digits, and the characters -, ., and \_.

Great repository names are short and memorable. Need inspiration? How about [didactic-octo-bassoon](#) ?

Description (optional)

Projecte per aprendre a programar en Python

Public

Anyone on the internet can see this repository. You choose who can commit.

Private

You choose who can see and commit to this repository.

Initialize this repository with:

☒ Add a README file

This is where you can write a long description for your project. [Learn more about READMEs.](#)

Add .gitignore

.gitignore template: None ▾

Choose which files not to track from a list of templates. [Learn more about ignoring files.](#)

Choose a license

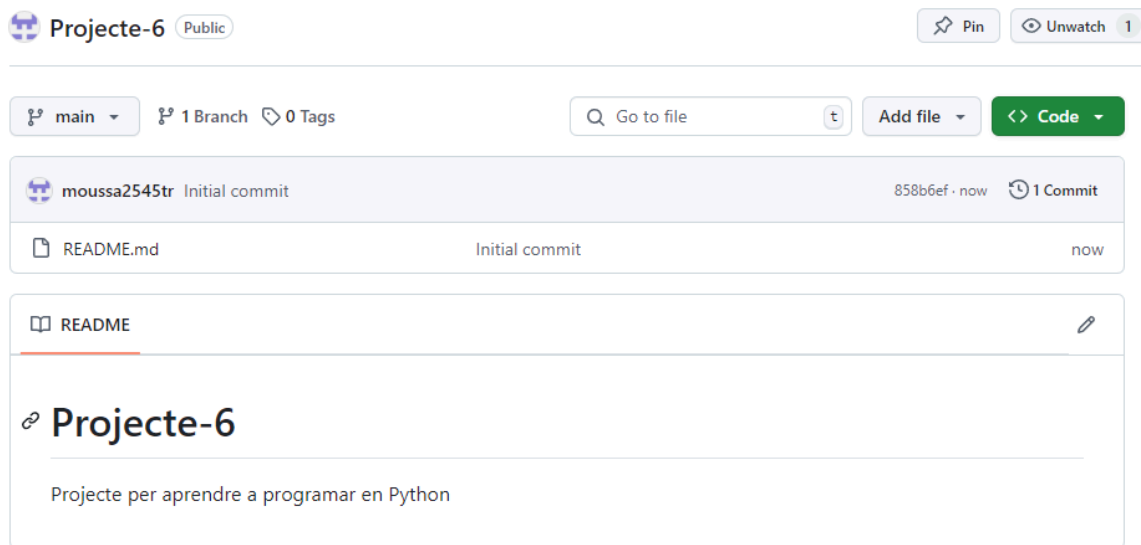

License: None ▾

A license tells others what they can and can't do with your code. [Learn more about licenses.](#)

I donem aquí per a crear el repository

Create repository

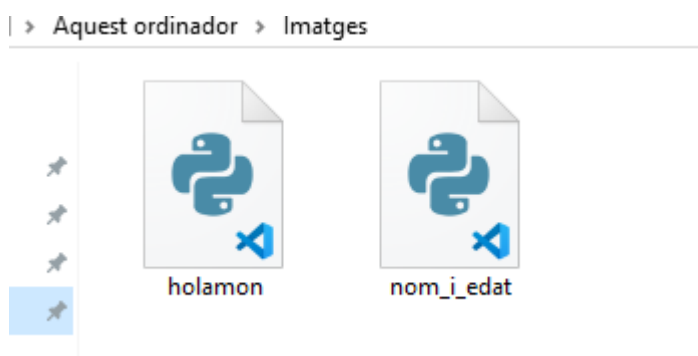

I aquí ja el tendriem creat.

I per a pujar fitxers tenim que anar en “Add file” i donem a Upload files.

I aquí seleccionem els fitxers que volem pujar.

i Aquí quan ja els tenim seleccionats donem abaix on fique “Commit changes per a que se guardin.

  
Drag additional files here to add them  
[Or choose your files](#)
